The members of the Company at their 22nd Annual General Meeting held on 30th July, 2008 had accorded approval to borrow monies upto a limit of Rs. 500 crores.

Section 180(1)(c) of the Companies Act, 2013 effective from 12th September, 2013 requires that Board of Directors shall not borrow money in excess of the Company's paid up capital and free reserves, apart from temporary loans obtained from the Company's bankers in the ordinary course of its business, except with the consent of the Company accorded by way of special resolution.

It is therefore necessary for the members to pass a Special Resolution under Section 180(1)(c) and other applicable provisions of the Companies Act, 2013, as set out at item no. 9 of this Notice, to enable the Board of Directors to borrow money in excess of the Company's paid up capital and free reserves. Furthermore, within its borrowing limits, the Company has been availing term loans/ working capital facilities from the institutions/ banks to meet its fund requirement. As per the loan agreement entered / to be into with the lenders, the Company has to agree to create mortgage and / or charge in favour of the concerned lenders on its movable/ immovable properties. This attracts provisions of Section 180(1)(a) [previously section 293 (1)(a) of the Companies Act, 1956] of the Companies Act, 2013, which necessitates approval of the members by way of Special Resolution as set out at item no. 10 of this Notice.

None of the Directors is concerned with or interested in these resolutions. Both the resolutions are respectively recommended for members' approval.

JITENDRA SHAH
CHAIRMAN

Annexure-1 to the Director's Report 2013-14
Management Discussion and Analysis

a) Industry Overview

Indian economy continued to remain sluggish during the whole year of 2013-14. The Infrastructure sector was one of the worst affected segments of the Indian economy and within infrastructure, power sector was the most badly affected. The sector faced plethora of problems. Many thermal power projects were delayed due to fuel problems. Hydropower projects were facing problems due to issues relating to land acquisition and protests by the locals. Many projects which were competed remained idle due to non-availability of natural gas. Prevailing tight liquidity condition only aggravated the situation.

Transformers are an indispensable component of an alternate current (AC) electrical system for electricity generation, transmission or distribution. In addition, the demand for transformers increases proportionately with the amplification of power generation, transmission or distribution networks in the country.

For power and distribution transformer industry, situation further deteriorated as the domestic demand remained depressed. Prevailing uncertainty in the power sector is doing no good to the Industry. In fact, number of companies reported negative bottom line during the year. Most of the companies were impacted by rising costs and dwindling sales. Also finance costs of almost all the companies have gone up sharply.

b) Opportunities

Power sector development programme in India has now gained momentum. Policy makers have realized that economic development of the country will be seriously jeopardized if due attention is not given to the power sector to ensure that sufficient and good quality electrical energy is made available to consumers at affordable price. As the power consumption increases, there is a need to transfer large amounts of power from generators to consumers. In India, there will be a significant growth in the T&D systems as the per capita power consumption increases to global levels and the per capita GDP moves closer the developed nations.

Ministry of Power, Government of India had envisaged a capacity addition of 86,500 MW in the 12th plan period. A corresponding plan for new investment and R&D is also conceived for the Transmission and Distribution segments in line with the National Electricity Plan and the Integrated Energy Policy.

Although large power project are spilling over and delayed, relatively number of small and medium sized power projects and subs-stations will be completed in the near future which indicates a prosper in demand for transformers. IEEMA (Indian Electrical and Electronics Manufacturers Association) along with government framed a policy to limit the imports of transformers from China and Korea along with changing government policies on import duty for CRGO steel is likely to further promote the domestic transformers industry in India.

Moreover, ageing transformers is creating potential for a booming replacement market. This demand is expected to be sustained by the growth in industrial demand.

c) Threats

Owing to cost advantage, Indian transformer industry continues to face tough competition from the Chinese manufacturers. Reliance on import for raw materials, specifically CRGO, is a major handicap for Indian transformer manufacturers in achieving faster turnaround time as well as lower production costs.

d) Segment wise performance

Power transformer forms the largest chunk of transformer market by value and account for about 60-70% of the total transformer industry. Distribution transformers would account for the remaining 30-40% of the total value of the transformer industry.

Your Company is engaged in manufacturing of Distribution Transformers ranging from 5 KVA to 3000 KVA and Power Transformers ranging from 3000 KVA to 25,000 KVA. The Company also manufactures solar and windmill transformers for renewable energy sector.

e) Outlook

The Indian power and distribution transformer markets are highly dependent on investments planned by the Government of India for the T&D segment and reform programs of the Central Government. These programs, when fully implemented as scheduled, are expected to drive the demand for both power and distribution transformers.

It is expected that the newly led government at centre will provide an environment conducive for growth & investments, with major reforms in infrastructure & renewable energy sector. With the continuous support from the government to promote the power transformer industry through investments, tax benefits, subsidies etc. will help the industry to grow over the coming years.

Growing Indian economy, growth in electricity consumption, growing industrial demand, expanding export market, large scale generation capacity addition, setting up of national grid, rapid expansion of urban and rural distribution infrastructure will remain key drivers of the transformer market in India.

In the present scenario, your Company will endeavor to focus on updating its technical capabilities to develop transformers of latest technology and design and in turn strengthen its market share and improvise its profitability.

f) Internal control system

Internal controls and systems have found to be adequate. These are reviewed periodically by the Audit Committee and efforts are made to improve further, wherever possible.

g) Human resources and Safety

Your Company continued its activities during the year in a cordial atmosphere with utmost co-operation amongst employees and the management. The management is committed to promote safety, occupational health and proper environment is design, planning, training and completion of all tasks. Trainings are imparted to workmen in various new techniques and systems.

During the period under review, your Company remains "Zero Discharging Pollution Unit".

The Company believes in sustainable development and is committed to discharge its social responsibilities to the extent possible. The Company regularly donates to the institutions for noble cause. The Company has taken initiative by indemnifying small vendors and to lend them support for their individual growth.

Notes Forming Part of the Financial Statements

1. **General Information of the Company.**

SHILCHAR TECHNOLOGIES LIMITED ("the Company"), incorporated in the year 1986 is a Vadodara, Gujarat, based **ISO 9001:2008** profit making and dividend paying Public Limited Company engaged in the business of manufacturing of "Distribution & Power Transformers" as well "Electronics & Telecommunication Transformers."

The Company made its public issue in the year 1995 and is listed on Mumbai Stock Exchange and Vadodara Stock Exchange.

2. **Significant Accounting Policies**

a. Basis of Preparation of Financial Statements

The Accounts are prepared under the historical cost convention and using the accrual method of accounting, unless otherwise stated hereinafter, to comply in all material aspects, with the mandatory accounting standards as notified by the Companies (Accounting Standard) Rules, 2006 (as amended) and the relevant provisions of the Companies Act, 1956 and in conformity with accounting principles generally accepted in India. Accounting Policies, not specifically referred to, are consistent and in consonance with generally accepted accounting principles.

b. Use of Estimates :

The Preparation and Presentation of Financial Statements as per the above bases required the management to make estimates and assumptions that may affect the balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the balance sheet and the reported amounts of incomes and expenses during the reporting period. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from those estimated.

c. Fixed Assets

Fixed Assets (as well as intangible assets, not being internally generated assets) are generally stated at cost of acquisition net of accumulated depreciation. Certain Fixed Assets which were revalued in 1995 are stated at the revalued cost.

Costs of subsequent expenditures relating to an item of fixed assets are added to its book value if they make a substantial addition to its value or increase the future benefits from the same beyond their previously assessed standard of performance.

Cost includes taxes, duties, freight and other incidental expenses incurred to bring the asset to its present location and condition, but excluding the element of excise duty & VAT for which credit has been availed.

d. Depreciation / Amortisation :

Depreciation on Fixed assets, other than Freehold Land and Capital Work-in-Progress is being provided on the Straight Line Method in accordance with the provisions of Section 205(2)(a) and according to the classification and at the rates specified in Schedule XIV to the Companies Act, 1956 on pro-rata basis for period of use during the year.

Additions made to Plant & Machinery, the value of which is less than Rs. 5,000 each and where the aggregate of such additions made during the year does not exceed ten percent of the Gross Block of Assets, have been written off 100 %.

Depreciation on increase in value of the Fixed Assets on account of Revaluation is charged against Revaluation Reserve. Consequently the depreciation charge for the year shown in the Statement of Profit and Loss is after deducting Rs. 4,37,428 (2013 : Rs. 4,37,428) representing depreciation on the Revalued Portion.

Computer Software (acquired intangible asset) is amortized considering a useful life of 5 years as estimated by the Management based on the nature of the Software.

e. Revenue Recognition

Revenue is recognized on transfer of property in goods or on transfer of significant risks and rewards of ownership to the buyer, for a consideration, without the seller retaining any effective control over the goods.

Sales are accounted on dispatch of goods (which generally coincides with the transfer of ownership) and are net of trade discounts, rebates, excise duties and sales tax. Sales as disclosed in the Statement of Profit and Loss include Job-Work income.

Interest Income is recognized on a time proportionate basis including interest accrued based on the amount outstanding and rate applicable and shown under "Other Income"

Income from duty drawback as well as other major items of income are accounted on accrual basis (depending on certainty of realization) and are disclosed separately under the head "Other Income".

g. Inventories

Valuation of Work-in-Progress is made based on combination of Standard Price Basis (Retail Method) and method using cost of material and proportionate amounts for direct labour, direct expenses and production overheads based on stage of completion. Finished Goods, other than those bought for resale, are valued on Standard Price Basis (Retail Method). Estimations of Cost and Margin under Retail Method for Finished Goods and Work-in-Progress are as made by the management based on combined use of specific order values and overall product margins on a year-to-year basis.

h. Investments

Investments are classified as current and long term investments. Current Investments are those that are not intended to be held for more than one year from the date of investment. All other investments are classified as long-term investments.

Long term investments are stated at cost. Provision for diminution in the value of such investments is made to recognize a decline, other than temporary, in their value. Current investments, where applicable, are valued at lower of cost or fair value.

i. Foreign Currency Transactions

Transactions in foreign currency, to the extent not covered by forward contracts, are recorded in Indian Rupees at the exchange rate prevailing on the date of the transactions. Exchange gains or losses on settlement, if any, are normally treated as income or expenditure respectively in the Statement of Profit and Loss.

Liabilities in foreign currency as well as receivables in foreign currency, being monetary items, as on the date of the Balance Sheet have been restated into Indian rupees at the rates of exchange prevailing as on the date of Balance Sheet. Non Monetary items, if any, which are carried in terms of historical cost denominated in Foreign Currency are reported using the exchange rate at the date of transaction.

j. Derivatives

Currency Dervatives :

The Company is exposed to foreign currency fluctuations on foreign currency assets and forecasted

cash flows denominated in foreign currency. The Company tries to limit the effects of foreign exchange rate fluctuations by following risk management policies including use of derivatives. For this the Company enters into forward exchange contracts, where the counter-party is a Bank. These forward contracts are not used for trading or speculation purposes.

In case of forward contracts the gain or loss arising on exercise of option or settlement or cancellation are recognized in the Statement of Profit and Loss for the period. The forwards contracts outstanding as at the balance sheet date, are stated at their fair value by marking them to the market and the corresponding exchange gain or loss recognized on the same.

Commodity Derivatives :

The Company is exposed to fluctuations in the prices of its raw materials. In case of principal raw materials such as copper, aluminium, oil etc, the risks on costing of the Company's products on account of fluctuations in prices of these materials is quite high. The Company tries to limit the effects of fluctuations in prices of these critical materials by following risk management policies including use of derivatives. For this, the Company enters into derivative buy or sell contracts for these commodities on the MCX Exchange. These contracts are generally not used for trading or speculation purposes. However, on few occasions, Company enters into derivative contracts for other commodities to try and offset losses, if any, in other commodity derivative contracts, in which case, the gains or losses on the same are treated as speculative in nature.

In case of such derivative contracts, the gain or loss arising on exercise of option or settlement or cancellation are recognized in the Statement of Profit and Loss for the period. The derivative contracts outstanding as at the balance sheet are marked-to-market and corresponding gain or loss recognized on the same.

k. Retirement Benefits

Employee Benefits comprise short term as well as long term defined benefit as well as defined contribution plans.

Contributions to Provident Fund are defined contributions. The Company's Contributions are charged to the Statement of Profit and Loss of the year when the contributions to the respective funds are due. There are no further obligations beyond the periodic contributions.

Retirement Benefits in form of Gratuity are defined benefit obligations and are provided for on the basis of actuarial valuation using projected unit credit method as at the balance sheet date. Actuarial gain / losses are immediately taken to the Statement of Profit and Loss and are not deferred.

Entitlement of employees accumulating earned leave and eligibility of compensation or encashment of the same is also a defined benefit obligation and is treated as long term in nature in terms of the policies of the Company for the same. The value of obligation towards the same is provided for on the basis of actuarial valuation using projected unit credit method as at the balance sheet date. Actuarial gain / losses are immediately taken to the Statement of Profit and Loss and are not deferred.

l. Borrowing Costs

General or specific borrowing costs directly attributable to purchase / construction or production of qualifying assets are capitalized as part of the cost of that Fixed Asset. A qualifying asset is one that necessary takes substantial period of time to get ready for its intended use. All other borrowing costs are charged as an expense in the period in which they are incurred.

m. Taxes on Income

Provision for taxation for the year under report includes provision for current tax as well as provision for deferred tax.

Provision for Current Tax is made, based on tax estimated to be payable as computed under the various provisions of the Income Tax Act, 1961.

Deferred tax is recognized, subject to prudence, on timing differences between taxable income and accounting income that originate during the year and are capable of being reversed in one or more subsequent periods. Deferred tax assets are recognized only to the extent that there is a reasonable certainty (and in case of unabsorbed depreciation or losses under tax laws, a virtual certainty) that future taxable income will be available against which such deferred tax assets can be realized. Deferred Tax Liabilities / Assets are quantified using the tax rates and tax laws enacted or substantively enacted as on the balance sheet date.

n. Impairment of Assets :

Assessment of Impairment of Assets (as covered under AS-28 Impairment of Assets) is done as at the Balance Sheet Date considering external and internal impairment indicators. If there is an indication that an asset may be impaired, its recoverable amount is estimated and the excess of carrying amount over recoverable amount is provided for as impairment loss.

o. Leases :

Assets acquired on lease where significant portion of the risks and rewards of ownership are retained by the lessor are classified as operation leases. Lease Rentals relating thereto are charged off to the Statement of Profit and Loss.

p. Contingencies / Provisions :

Provisions are not discounted to their present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Other Contingencies, the outcome of which is not certain, have been disclosed in these notes as Contingent Liabilities. Contingent Assets have not been provided for.
